

SHIPPING CASES

9" FORD REAR END CASE

This unique storage case is very versatile. The 9" Third Member securely bolts into the base of the container, the lid is then bolted into place to provide a safe and dust free storage container. It is durable enough to ship your expensive third members on common carrier or store your spares in your race trailer. Manufactured from polyethylene makes them easy to clean.

Part#	Description
5199	9" Ford Rear End Shipping Case
4150	Holley Carb Shipping Case
5198	Transmission Shipping Container
5120	32" Automatic Transmission Shipping Container
5125	46" Automatic Transmission Shipping Container

NOTE: Rear End and Carb Case standard color is grey, all other colors are special order.

HOLLEY CARB STORAGE CASE

Designed around the Holley 4150 series carburetor, this unique unit has ample room to clear most air cleaner studs. This heavy duty durable unit is ideally suited for shipping or storage of your delicate carburetors. The carburetor secures to the base with bolts or studs, bolt the lid into place, you then have a completely protected unit that is ready to ship or store. The base can also be used as a handy stand for working on the carburetor.

TRANSMISSION SHIPPING AND STORAGE CASE

Heavy duty case made to fit four speed Jericos or T-10's. Allows you to ship your transmission by UPS. Overall dimensions are 16.5" x 16.5" x 42". Includes mounts. The case is stackable for multiple transmission storage and nestable when not in use.

AUTOMATIC TRANSMISSION SHIPPING AND STORAGE CASE

Made from tough heavy duty polyethylene and available in two sizes to accommodate most transmissions. These boxes are available with changeable inserts (for a different transmission to be carried in the same box) and can also be ordered in custom sizes and colors. It has a stackable interlocking design and can be embossed with private labeling (custom logos, property of...", etc.) Protected by US & Foreign Patents.

5120 IS UPS SHIPPABLE!

UTILITY JUGS

Square design eliminates unusable spaces around the jug. They mate naturally and fit flush against walls and other flat surfaces. The original funnel top design and molded handle helps bleed air into the jug allowing the entire contents to be unloaded in approximately 9 seconds. The extra heavy duty lid is warranted for the life of the jug and all jugs exceed UN standards. See overleaf for available colors.

LINK BARRIER SYSTEM

- Rotationally molded from UV stabilized polyethylene
- Smooth surface is ideal for graphics
- Each barrier is an advertising opportunity
- 3/4" NPT in center for attaching PVC pipe for banners, etc.
- Also useful for controlling crowds, parking and traffic

The Link Barrier System from Scribner Plastics is a unique design that benefits track operators and kart racers alike. Quick setup and flexibility make almost any layout possible. With our complete line of accessories, your track can be transformed into a unique and participant pleasing venue.

ENGINE CASES

Designed to ship complete engines by air or ground

The Chevy mounting system utilizes two molded plastic mounts that bolt directly to the triangular motor mount pads on the side of the block. The engine is then lowered into the bottom half of the container. The back of the block bolts directly to the container using four of the bell housing mounting bolt holes located just above and below the dowel pins. Bolt the top half of the container in place and you are ready to ship or store your engine.

SPECIFICATIONS FOR PART #5108

Overall width	28"	*Inside width max	24"
Overall length	40"	*Inside length max	37"
Overall height	30"	*Inside height max	25"
Empty container weight	36lbs	Inside floor width	20"
